Thread: [Masterchopper AIO with Tribot doesn't work](#)

kpown - July 20, 2017, 12:22 pm

i purchased the masterchopper AIO and tried to run it.

It doesnt seem to work..... its going to the bank and not banking anything and it goes to stand next to trees and doesnt cut them...

any ideas how to fix this?

It seems like the bot is putting the cursor in the correct place but for some reason it's not "clicking"

here are the settings if anyone is interested

Does the bot have any config that you're required to set-up?

Yes but I've tried several settings. Unfortunately none of the settings seem to work, same issue each time

Where abouts are you cutting logs? Mind taking a screenie of the config that you're using?

I didn't even check where... I set it on 1-99 progression as the mode, the other option was "normal". I have it banking as well.

For some reason it can't "click"

No idea then mate, contact the script creator and get him to troubleshoot for you.

I added him on skype but he hasnt responded as of yet...

what scripts do you all use?

Here are the settings menus

If I were you I'd use OSBot for multiple reasons, if you need suggestions for scripts on there I'd be happy to help. Not too knowledgeable on Tribot scripts if I'm honest.

Its too late now, because I have purchased a subscription for tribot as well as a subscription to this premium script. Masterchopper AIO is supposed to be the best script on the market for wc atm so this is upsetting

EXPLICIT CONTENT - July 20, 2017, 2:04 pm

It is most likely due to todays update.

Most bots have issues.

ah bummer

I heard tribot community is extremely active so hopefully a fix comes about soon??

how long does this usually take? im new to this

SippinAcid - July 21, 2017, 1:25 am

Wtf why would you post on hackforums not on their forums?

Bots are/were broken after the update, developers need to fix it.

Because their forums suck ass compared to this one and there's plenty of rs botters here

TheMTGuy - July 21, 2017, 8:51 am

Every 1-2 weeks RS has updates causing the client "hooks" to be outdated thus the bot not working untill the client developers push through the new update which takes 12-24 hours most of the time.

Minimap configuration broke this update which caused several clients to go down.

Runemate released a patch last night so we're up and running ?

Aye lucky man! I use OSbot and the patch rolled out 2-3 hours ago. So it's botting time!!

GreenStuff - July 21, 2017, 11:46 am

TriBot sucks so bad, get VIP on OSBOT, you will bot forever

kpown - July 21, 2017, 4:14 pm

Tribot is all good to go

Been botting all day!
