Is there a forum member with balls who can teach high inbox rate email sending techniques? I'm sad to see no one on HF is good at this subject. Willing to pay to a mentor. Looking for massmail for BH. Have csclus' smtps brute forcer and bruted smtps are all shit. Purchased a bunch of smtps from various users and all their smtps are shit too.

As I heard people are using shells who are getting high inbox rate. PM me

Wanna send from customized sender

When you say "no one on HF is good at this subject" and then proceeds to ask HF for help on said subject.

Nobody will do this for free thought I saw many on marketplace but I doubt there are any free ones.
