Thread: [\[Tut\] 1k Fb Page Likes/Day - How to Grow Facebook Page from 0 - Go Viral from day 1](#)

OxaByte - July 21, 2017, 2:08 am

Hello,

As per my extensive knowledge on growing a Facebook page i want to share my method with you . At first i thought to sell it but i want to contribute towards this community , So lets cut the crap and start the tutorial.

I Own 2 Facebook Pages & 3 Groups. Here are insights of my facebook pages.

Page 1:

Page 2: I Have Created this page few hours ago , So i have 600 likes now. Page need 24 hours time to get the insights , so i will upload screenshot tomorrow .

Here are some tweaks you need to know about the facebook pages.

1. Never Pay for Facebook booster because those are inorganic likes, You will get lots of likes by spending money to facebook but you will not get enough post engagements because they are inorganic likes
2. If your page is new then dont post Links to your facebook page because links have less reach .
3. Only post Images, Gif's, Text with less than 30 words .
4. Videos uploaded to page have the highest reach .

How to get likes?

The best way to Get likes are to share your FB page posts in the facebook groups and they are organic likes.

Here are few things to know about the Facebook Groups.

1. Only post in the groups which have similar category according to your page . For example i have the page "Indian Army" So i will share my posts to groups which are made by "Army Fans" With more then 1 million members.
2. Some groups are set to Approval by Admin , so just wait for admin to approve your posts and if they dont approve , Directly message them in their inbox to approve your post.
3. If Facebook groups are not approving your post then just post in public groups.
4. Join hundreds of groups about army and share your posts in all of them.
5. Only share posts which have more engagement . That posts where users comment and share .

If you follow these steps you can start getting 1k likes to your page everyday. and once you have reached 100k in few months then you can start posting your website links , So you can also earn by your facebook page.Say thanks if you likes the tutorial.

I share in 10 groups everyday. i get aprox 1k likes everyday.

manmad - July 22, 2017, 10:10 am

That's interesting, I share my pics to around 20 groups daily, they have from 5k to 50k members, which apparently isn't that much and I would get around 50-100 likes(daily), + I have 9,000 likes on my page, but the post reach is ridiculous, like bad(when not sharing my posts in different groups). How many members do the groups you share to have and around what post reach do you think is normal for a page with around 10,000 likes, when not posting in groups :?

i just got 89 million members group. he made me moderator . But this group is not my facebook page category so i made another page with the same type .

i have my 3 groups in which i share the most

1. 30k members
2. 30k members
3. 20k members

i share in 5 other groups with 1lac+ members. Because my page is hacking based so their is very less groups with maximum number of members.

Because my page is hacking based so their is very less groups with maximum number of members.I see, thanks for the information man, I'll try to post in bigger groups, I only don't know why my post reach is bad, from around 9000 likes, my posts get around 200-500. The weird thing is that I used to get 400-800, but it just dropped.

try to increase the quality of posts and post only that stuff which make users to comment and share your post.

SIM-570417 - July 22, 2017, 5:38 pm

you through to sell this? lol

Aficionado - July 23, 2017, 12:06 am

Nice tutorial man, will try using it later on.
