For reference, check out this thread;

<https://hackforums.net/showthread.php?tid=5669941>

This report is true and accurate, OP is closing his threads and making up stories to cover his tracks.
Sorry OP but you got jipped, this guy is a 100% rat.

So you went first to a member with 18 rep for \$400 and expected not to be scammed? lol

Paimon - July 24, 2017, 6:58 am

Purchased his Twitch spammer which does not work at all, user even closed the sales thread. I wouldn't doubt it if he scammed you OP. GL with this.

Boolean type - July 24, 2017, 7:11 am

This is a huge loss. Man next time do your research, and do not trust anyone with 400 usd, use middleman. Hope you recover it somehow.

maldev0 - August 10, 2017, 10:21 am

xna you have to be proud to be an irrelevant skid, ain't ya?
you're ripping off people with non-existent products like this bot. Imo you have just proved your incompetence and your inability.

@OP

protip: next time if someone offers you a hVNC, or claims to have a working one, get a Windows 10 in your VM, install the latest updates and let it run there to make your tests. A functional hVNC module or code (can't remember) is currently going around for Windows 10. The price is around ~15k USD.

I am sorry for your loss. Be sure that you're not dealing with such technically inept skids again.

Kind regards
