Hello, so there is a free RDP site which I like to share to you guys!

RDP: [apponfly.com](#)

I'll appreciate if you vouch it works etc! I would use this RDP just for fun not for work and stuff because its only user RDP's.

Thanks!

website is in OP guys

the downside of apponfly is that it's very very short lived

meaning, u can't even browse a whole lot before you're stopped for "over usage"

And the fact that you can't run exe files

Pretty useless "RDP" to be completely honest.
