Thread: [Telegram Round Bot \(drop usernames, compile list, check leechers\)](#)

coldy - July 21, 2017, 4:26 pm

Today I am looking for a Rounds bot for Telegram, due to me recently opening a group I would like to have the ability to automate rounds so that we get the best engagement possible.

This bot must be able to:

- Let me set specific times to drop usernames
- Check for leechers after the round ends

Telegram groups that use a similar bot:

We are looking to spend \$50-\$100 on a PRE-MADE bot. We don't need anything custom.
