Thread: [-----Brand new spreading method! 100% success rate!!!!!!-----](#)

SORRIE - July 22, 2017, 11:32 pm

So you're looking to spread your RAT? Are you aggravated and burnt out trying free and paid methods that just don't seem to get you clicks? This is the thread for you, and aside from the materials you will need it is ABSOLUTELY POSITIVELY FREE!

This method is called the "Invasion Method" , here is what you will need.

1. A bat [Not a .bat file] You're going to want this bat to be preferably metal and very heavy. [optional: metal spikes / barbed wire on bat] Spoiler [\(Click to View\)](#)
2. A flash drive with your RAT on it. If you don't know what this you can just toss the bat because that item would be too complicated for you. Spoiler [\(Click to View\)](#)
3. A car, motorcycle or virtually any motorized vehicle, preferably without plates. Spoiler [\(Click to View\)](#)
4. A gun, any gun. You don't have to load it but you might want to. Spoiler [\(Click to View\)](#)

So now that you have your items, here's what to do :D

Step 1: Find your target. You should be looking for houses in middle class neighborhoods, houses just nice to have multiple pc's but no security system that's always armed.

Step 2: Enter house. Here you have a lot of freedom you can come at night, during the day or any combination of the two depending on the target. Here is where you are going to utilize the Bat and or the Gun. You can either knock or break into the house, however i prefer knocking. Someone will usually answer after looking through a peephole so I recommend not wearing a mask or brandishing the bat or gun initially. As soon as the door opens you can either immediately knock the answerer on the head [with bat] or threaten him with a gun, although since you're trying to get this person on your RAT I wouldn't recommend shooting them. Again, you have a lot of freedom when it comes to breaching the target.

Step 3: Initiating the RAT. I assume you have either put the people in the house in the basement, a closet, or somehow put them to sleep, it is essential that you draw no suspicion to the computers that you are trying to infect. This is when you pull out your USB and you run your RAT on all of the PC's in the house. Again, make sure no one sees you do this so they are just thankful they still have their pc's and continue to use them. Before exiting the house make sure that you take a couple of things so they think they were robbed and also tie a rubberband around their spraying thing on their sink so when they turn on the water it sprays at them. [This is ESSENTIAL]

Step 4: Exit. Get the fuck out they either called the cops while you were in the house or they did the instant you left, get the fuck out of there or you'll do time.

Step 5: Repeat and look as your slave army grows.

You're welcome for this new, free and unsaturated method. :D

I don't think teaching or provoking people how to invade houses is a very smart idea.

I don't think having a massive dick up your ass is a good idea either but we're both doing our own thing.

I think you're taking this a little too seriously, you're the reason cereal boxes have to have a little asterisk that says "enlarged to show texture" next to the head sized captain crunch.

Mr.Ransom - July 23, 2017, 12:51 am

Then Lets break into OP house, And Knockout with him a bat. Then Execute our RAT.. JACKPOT

OP, Please be little more helpful by giving your address.

SlowMehMo - August 16, 2017, 4:19 pm

Execute with bat, then execute .bat, perfect method. all of Louisiana may be scared of "The Flash Drive Slaughterer" but i am proud to say i am the owner of 2 infected machines, had some trouble in the first 800 houses when i forgot the ratting part. I keep geting this "sheriff" and "Unknown.Assailant.Investigation" connections but hey its a start.
