Code MY REPLY BEFORE IT WAS DELETED FOR SALES TRASHING
[quote='True Money' pid='55420501' dateline='1500840619']

This was done in a public discord where I asked for early vouch copies. I don't have screenshots since I have a prune script and I accidentally pruned all my messages so I can't provide you with this.

edit: Nice multi btw

Is multi a go-to response for people on here?
For some reason when I checked the upgrade page the trust scan feature was only available for 3P1C&UB3R users yet you only seem to have 1337 ?

also, 'I asked for early vouch copies', copie[b]s[/b], I only see one review which someone might've gotten from your discord server.

Also, he happened to give you a +rep about the method on the day you released the method not a week ago when he received it and first profited.

Won't bother arguing this, no-one will win, but I will leave this here since imo this is sketchy, and the thread designer person, he is affiliated with you, you could've just asked him to leave a positive reply.

As a user somewhere above stated, will be waiting for a non-biased review :)

Edit: I'm loving these buddy vouches, very lovely, saw you vouching on [hackforums.net/member.php?action=profile&uid=2598450](#) and the OP from that thread vouched here for you with a generic ass vouch, I also like

Had a chance to look at this before he released it. The method looks good and can earn you a couple of bucks in a short amount of time.

Has my vouch.

Don't understand why you'd let someone just look at your eBook for free ?..

You also are affiliated with him, yet again, another affiliated vouch:
You've talked to him '07-12-2017, 06:03 AM' since you repped him at that time.

You also vouched for him again, what's this, buddy vouching again?

Users like Vyrez are included in this thread by Mr Reviewer,

Who you seem to be affiliated with and many of the people on there have sold supposed 'false' eBooks I guess.

Who needs buddy bumping when you can have buddy vouching am I right?
Archiving this reply, will make it into a thread if needed, can't wait for the report for sales trashing.
I wrote this reply, and as predicted it was deleted for sales trashing.

I'll leave this here since I'm going off to bed soon, I'm pretty sure this is some trash eBook with public methods, telling by the vouches all being biased and affiliated.

hackforums.net/showthread.php?tid=5674633

this is the thread in question, I'm talking about the vouches of:
hackforums.net/showthread.php?tid=5674633&pid=55400295#pid55400295
hackforums.net/showthread.php?tid=5674633&pid=55400623#pid55400623
hackforums.net/reputation.php?uid=3273519 (Affiliated since like 3 days ago)

False Claim:
hackforums.net/showthread.php?tid=5674633&pid=55400985#pid55400985

More biased vouches:
(Not Meow, I couldn't find them being affiliated.)
hackforums.net/reputation.php?uid=2598450

Anyway, not all of these might be affiliated, but I'm gonna quickly bet my soul that they are, they've got some vouchy shit going on, these users can probably all be linked together in some way, but as said before, i'm too lazy, i might later tho idk.

It also fascinated me that after I was warned, aka my post was reported, the user "True Money" aka the seller could be seen viewing my reputation, my first thread, etc..

Seems like he's feeling a bit insecure, ?

all in all, don't take this alert too seriously, but i suggest staying away from this eBook, but feel free to buy it if you want to :-)

disclaimer, the way i link these users together is by reps from a while ago as well as them vouching for each other b4

P.S.
Earlier I asked how he chose people to get the eBook early for them to have it before the sales thread, he said it was in his discord group but he accidentally purged the messages, so (y), and he said he gave away vouch copies in the discord, but there was only 1, i wouldn't be surprised if thats'bs.

P.P.S if some stuff im referencing isn't on the thread it's cause he deleted his messages after mine were deleted after reporting.

final disclaimer, i don't mind people defending True Money or attacking me, but before you do, be

real for a sec, ok thanks

g'day hf

Next time you decide to post something like this, browse whole marketplace first and once you figure out 90% is pretty much this, start writing it down. You'll be done just in time to celebrate your 78th birthday.

FYI he's banned for being a multi but he actually gave me a copy to review.

He gave me two copies of his ebook, the first one was horrible so I told him to make another one and he made another one and gave me it again.

I only know him from the Revolution discord. Keep me out of this, thnx.

Minimalist is in the same discord as well and everyone in there saw I shit on his first version of his eBook for being terrible.

Meow - July 23, 2017, 5:40 pm

It seems like True Money got banned for multi accounts.
