Thread: [how to stop ip grabbers](#)

xX_I337_h4x0r_Xx - July 24, 2017, 2:20 pm

step 1 use firefox

step 2 get policeman addon <https://addons.mozilla.org/en-US/firefox/addon/policeman/>

step 3 only hackforums will load, everything else will not

step 4 enable whatever image hosting site you want

step 5 ???

step 6 ip grabbers are now salty

step 7 post url on 4chan to troll harder

noscript gives me cancer

snappari2 - July 24, 2017, 3:12 pm

Nice tut I like step 6 the most.

Or you can just disable avatars and signatures in your usercp. No need for an addon or custom browser settings.

can't you still see images in threads? also its for blocking sketchy image hosts requests, allows to see imgur but not newimagehoster.biz

Yes but how can someone distinguish from an IP grabber which account it belongs to? Placing an IP grabber in a random thread will only generate dozens or possibly hundreds of IPs.

There is a moronic belief that if someone has your IP you're at a high risk. It's just not true. I'm here

10 years and I don't hide my IP. If it's not a problem for me, it certainly won't be a problem for members.

Then do it. What do you think the OP's add-on will do?

Why not just use a VPN for this site, or just in general?

Jarl - July 24, 2017, 5:04 pm

Why not just use vpn and let our god admin deal with the ip logger skids.

Policeman - Last Updated: January 18, 2015
Has this add-on been adandoned?

snappari2 - July 25, 2017, 3:00 am

Oh I just read through this again and noticed it was for hackforums, you should just use a VPN

xX_I337_h4x0r_Xx - July 25, 2017, 3:00 am

<https://github.com/futpib/policeman> that is correct, but it is still as effective as ever due to the type of functionality it adds.
