Hey all,

Introducing to you:

Kigbot v.1.2.

Instagram all in one tool, straight for your computer completely for FREE!

(sorry img doesn't appear for some reason)

Download: <http://www61.zippyshare.com/v/szck0qGE/file.html>

Virus scan:

How to use:

- 1) Insert your IG Username.
- 2) Insert your IG Password.
- 3) Insert a user you want to take followers from.
- 4) Insert breaks between follows (for example, if you want a break between each follow to be 30s, then just type in 30, if you want it to be 2 minutes, just type in 120 (2 minutes x 60seconds =120))
- 5) Insert how many people to follow (for example, if you want to follow 50 people, insert 50) For example:

I insert instagram to the take followers from and it will follow people who follow instagram account.
