Thread: [Earning \\$100/Day , What's yours per day ??](#)

L333T - July 26, 2017, 9:22 am

Hi , I am Nabid007 .

Recently i have found out some methods which is generating around \$100 Per Day ? ..

I thought to share my stories today.

Around 6 months ago , I joined HackForums. I heard lots of things about it from my friends. I got down with a \$115 type of investment. The \$15 is important cuz i stole it from my Mom's purse ? ...

However, I bought some guides in HF. I am not disrespecting the Authors here , But i must say 90% of the guides regarding money making are bullshit. They are mostly outdated and saturated. I burnt around \$70 in that process.. Keep in mind i am 18 year old kid from an Asian country. So, From the perspective of my location i would say i burnt a handsome amount of money..

Then , Later on i understood that there is no "Magic" formula out here to make money.

But one thing hit my mind. That's the monetizing Techniques. I thought to mix the methods and try out something new.. I thought to start a T-Shirt Campaign. It paid around \$129 or something in the first month. The fun part was i only paid around \$20 in the advertising.. Later on, i also started 4 online business for trying. 3 of them failed and one worked.. Now i am just doing fine.... Would like know how much you guys make ?!

I am thinking to Scale it \$250 a Day... How much do you want to scale your earnings and Do you want to share any new ideas here or any advices to how i can scale more ?!

I am just a Knowledge Geek . I would love to acquire something from here :)

All eBooks are bs the only way to make money with them is sell them. And when new members keep joining people will sell eBooks.

OP you should repay your mom stealing from her is wrong. If you steal from her what makes anyone on the internet think you won't try stealing from them?

Already gave her back. But the problem is even though i am earning enough , i can't share with the Family. They will probably be scared. Any Advice on that ?!

Mr.Peanut - July 26, 2017, 10:32 am

I'm starting to see my side sources of income drain up. I caught the trend a while back so I put a lot of my money into a new business (irl). The first 5 months were nothing but development. Even though it's not my best source of income (yet), it's considered my main source. After 2 months of starting off (after those 5 months), i'm looking at around \$50/day after taxes and operating costs. Not too bad but that number will be much higher in a month or two. It's kind of guaranteed actually lmao.

I'm expecting \$100/day at a minimum within the next month or so.

Edit: To anyone wanting to start a business, grind out all the shitty stuff now so it could (potentially) pay off later.

Just a personal suggestion, invest time and/or money into better analytics. Find out the causes of spikes of sales (down to a science). It can help you greatly and possibly even give you leverage to repeat those numbers (considering you're investing enough in exposure or whatever it is).

Really amazing to hear success stories.. I probably guessed what you are doing. If that's so, then you can constantly increase your income.. My main benefit is i am in a offshore country where Taxes are kind of optional. You only pay when you are too noble or too rich :3 .. However, I guess i am still under the radar as 3k per month won't be much as i am reinvesting most of the money in new projects to see how it goes...

To all the Fellow Members : About business, You need to know the right timing and research :) .. Don't just jump without knowing... Know enough and jump in.. You don't need to know everything.

Life is all about risks.. As a 18 year old i guess i took much more risks then any adult can handle.. But yet i seek more business to be done.. You know, You need controls in your business. You need to have a very clear knowledge about what you are doing or else you will eventually fail..

Control = Less Risk = Success :)

I can range from \$10 a day too \$80-\$100 a day selling My Security software. I think the average is probably \$30-\$50 a day though (Currently). Making more relies on me investing money into advertising or coming up with new features to attract different users. So I wouldn't say it's something I can just sit back and collect money from "easily". Nor is it my full time job so It's not like I'm working on it 8+hours a day. If I stop keeping up to date then my sales/user base drops quickly. However with features that we have in the works I feel like I can bring the average up too around \$50-70 a day but that will take some time.

Like you said there's no "Easy" method. It usually requires hard work.

SLY - August 1, 2017, 9:33 am

When i joined the forum , I sadly made the mistake of purchasing a "money making e-book" . Any e-book promising you that you will make money online easy is a load of bull . However there are a few methods that do work but people won't share that because it will become saturated. But at the moment i make my money through crypto currency investments.

Armada - August 1, 2017, 9:37 am

Generally speaking.

Regular job (Full time security) \$125/day

Online income: \$350-500 a day (varies)

So roughly I'd benchmark around \$500 a day.

But again, this varies, so gotta save a few nest eggs about just in case of those hard times. ?
