Thread: [priv escalation for Linux ubuntu 3.2.0-107-generic #148](#)

lazy_kasi - July 26, 2017, 9:26 pm

I'm desperately in need of help in this issue.

```
www-data@ubuntu PHP> system_info
```

```
[-][cd] Failed cd '': no such directory or permission denied
```

```
+-----+
| client_ip      | ***** |
| max_execution_time | 30      |
| script        | /images/avatars/k_backdoor.php |
| open_basedir   |         |
| hostname       | ubuntu  |
| php_self       | /images/avatars/k_backdoor.php |
| script_folder  | /var/www/images/avatars |
| uname         | Linux ubuntu 3.2.0-107-generic #148-Ubuntu SMP Mon Jul 18 20:22:08 UTC
2016 x86_64 |
| pwd           | /var/www/images/avatars |
| safe_mode      | True |
| php_version    | 5.3.10-1ubuntu3.26 |
| dir_sep        | / |
| os            | Linux |
| whoami         | www-data |
| document_root  | /var/www |
+-----+
```

Tried meterpreter also

```
meterpreter > ls
```

```
[-] stdapi_fs_stat: Operation failed: 1
```

```
meterpreter > shell
```

```
Process 8158 created.
```

```
Channel 0 created.
```

```
[-] core_channel_interact: Operation failed: 1
```

pls help

Thanks??
