SPECIFICALLY TALKING TO H3GOD/QTUM/BULLSHIT - fuck you

So I am tired of all fucking ebooks on HF, they're all garbage and don't do shit.

DO NOT BUY THEM NEW MEMBERS. THEY WONT DO SHIT FOR YOU. THINK ABOUT THIS. WOULD PEOPLE NEED TO SELL THE EBOOKS IF THEY HAD A WORKING METHOD? NO! SO DONT FUCKING BUY THEM!

CleanCarrot - July 28, 2017, 8:02 am

I totally agree with you, I bought like 2 ebooks in my life and the 2 were totally shit.....

But I think that not every ebook is shit. I bought shit for 10\$, it wasn't worth it. But there are some good ebooks too I think. But never buy ebooks that costs more than 5\$...

perm - July 28, 2017, 8:03 am

Some ebooks are shit.

Some worked at one point but are oversaturated.

It all depends on who you're dealing with, and what the ebook is about.

Wet Rag - July 28, 2017, 8:04 am

It's really common sense...

Deany - July 28, 2017, 8:05 am

You can't buy intelligence, some people are just born stupid LOL.

Too many idiots think a "make \$1 million" over night with \$0 is going to work.

The only way to stop him his to message members. If you post on the thread he'll just report the posts and they'll get junked for "sales trashing"

thePoltergeist - July 28, 2017, 8:07 am

I wish there was a really good review board to verify all the ebooks sold.

@mr reviewer

@Jupiter - July 28, 2017, 8:08 am

Talk about massive sales trashing

but i agree with you :)

I purchased one and totally regretted it lol

Exactly. It would be the only good way to clean up the e-book market.

Eagerkid - July 28, 2017, 8:10 am

That is why you should invest in knowledge and not "click a button and make 100k "

Young Dagger Dick - July 28, 2017, 8:10 am

This is facts, you look at all the reputable members and think "well they seem to know their shit, they are hackers!11! " when you first join "why would they lie?" and the answer is money. I made the mistake of purchasing for h3god when I was new.

TO answer your question, it's because people want easy money. And I'm talking about both parties.

Are you just now figuring this out? "Most" eBooks honestly just need to be disallowed on HF or some sort of formal verification process.
