Thread: [Linking to .onion sites](#)

I went to the memberlist and searched for ".onion" and I found some members that have an onion link in thier profile as a homepage.

Is this allowed?

Quote:Deepweb Discussion

Deepweb is a phrase to describe hidden websites on the internet that are often, but not always, directly related to illegal activity such as child porn, carding, hitmen, and other very illicit material. As such we're not going to allow it here. Not even the slightest discussion of the deepweb will be allowed.
