You would make more money if you live in the US but I think it's worldwide.

You have to add a Dword value and make sure you have the new version of internet explorer.

Weird do you have flash installed? I tested this on windows 7 and 10 it works perfect.

Also try that last step in the thread about regedit.

I updated the download link with a new version but the issue is with earnhoney not the bot they may be out or low on ads.

Follow the last step in the thread about regedit.
