Just started playing this and it's weird as fuck. Anyone else been playing it and is it as good as people make out?

I don't know what to think off the whole weirdness of it all.

EDIT:

Got a little further in:

Recorded a little bit of that fight, intense shit lol.

When you say finished it; do you mean got all the achievements (or PC equivalent) or you finished the story? How long did it take and is the story good?
