Plexcoin, a new crypto currency coming up next week.

What do you guys think about it? Is it legit?

Can you provide some links and information?

They've been advertising alot lately since I'm seeing ads on my FB newsfeed ever so often

They also claim that they'll even give you a VISA card to make purchases and what not with their currency.

I'm just a bit skeptical whether or not I should invest in this next week.

Most advertised coins are scams

Shitty referral scam.

No whitepaper or team.

No whois with details who's behind this.

Nope.

so this was a scam? My friend invested a bit in presale and now site`s down, just wanted to hear you opinions, doing my own research I found that most of the facebook likes were bought and owner was anonymous
