Thread: [*Major update* Light Weight HF PM Notification for Desktop \(Updated 8/14/2017\)](#)

Who Soup - July 29, 2017, 7:01 pm

I made a light weight program that gives you a notification if you receive a PM on HF.

Features:Hide API key

Set custom refresh time (in seconds)

very light weight (264 KB)

Easy to use

Remember me option

Log option to view messages you might have missed

Security Notes:Please be sure to lock your key to your IP address in the [API Key](#) page. This will almost fully remove any possibility of being compromised.

If you are compromised immediately visit the [API Key](#) page and remove that key.

Logs are not saved. When you exit out of the log window all logs will be erased.

Preview:

Get your API key:

<https://hackforums.net/apikey.php>

Download:

<http://ge.tt/9YIbv9m2>

Virus Scan:

<https://virustotal.com/#/file-analysis/MDUwMDUwNDAzOTY4NzZjYjQ0YTczYjU4NDAzMjhkMDc6MTUwMjY4ODcxOQ==>

If you have any suggestions on how I can make it better or future applications that you want please let me know ?

Discord: <https://#/JqxrVDE>

Drug Problems - July 29, 2017, 7:02 pm

Awesome release Who Soup

This will come in handy for a lot of members <3

Ratt - July 29, 2017, 7:03 pm

Thanks for this, going to come in handy until Omni covers it.

TheSuspect - July 29, 2017, 7:09 pm

Looks awesome, will download this when I'm home, nice work

idalistrades - July 29, 2017, 7:11 pm

Pretty neat and useful application!

Younis Khan - July 29, 2017, 7:20 pm

i was used and abused as tester, where's my soupcoin?

Meow - July 29, 2017, 7:24 pm

Marvelous, going to download it asap.

Thank you! ?

Who Soup - July 29, 2017, 7:38 pm

I just updated the link and scan, I added two things: I made it so you can't click "start" unless something is typed in at least one of the textboxes (to prevent the program from bugging out)

Fixed the borders

If you guys come across anything or have any suggestions please contact me on discord ?

?Üta? - July 29, 2017, 8:35 pm

Fantastic tool. One suggestion would be to let it minimize to a tray icon having that tab open bugs me. Thanks for making this!

NinjaLeaks - July 29, 2017, 8:37 pm

Ay that's awesome! Totally gave me an idea to make something hahaha.

Definitely will be using it!

Who Soup - July 29, 2017, 9:23 pm

(Jul 29, 2017 08:35 PM)?Üta? Wrote: [\[CITE\]](#) Fantastic tool. One suggestion would be to let it minimize to a tray icon having that tab open bugs me. Thanks for making this!

Good suggestion.

I just implemented it in the newest download. ?

TheSuspect - July 29, 2017, 9:31 pm

Can you make it so the notification is more like a windows notification rather than a button like thing that pops up in the middle of your screen?

Who Soup - July 29, 2017, 9:56 pm

(Jul 29, 2017 09:31 PM)TheSuspect Wrote: [\[CITE\]](#) Can you make it so the notification is more like a windows notification rather than a button like thing that pops up in the middle of your screen?

Thank you for your suggestion.

I just added the newest download to the thread. ?

?Üta? - July 29, 2017, 9:58 pm

(Jul 29, 2017 09:56 PM)Who Soup Wrote: [\[CITE\]](#) Thank you for your suggestion.

I just added the newest download to the thread. ?

If I could +rep you again, I would. Thank you so much for listening to the suggestions. ?

Shoe - July 29, 2017, 9:59 pm

Very nice. Any intention on releasing the source?

TheSuspect - July 29, 2017, 9:59 pm

(Jul 29, 2017 09:56 PM)Who Soup Wrote: [\[CITE\]](#) Thank you for your suggestion.
I just added the newest download to the thread. ?

Thanks, you are updating this with godlike speeds.

Who Soup - July 29, 2017, 10:55 pm

(Jul 29, 2017 09:59 PM)Shoe Wrote: [\[CITE\]](#) Very nice. Any intention on releasing the source?
I'll release the source when it goes hot ?

?Üta? - July 29, 2017, 11:23 pm

Not sure if this is on my end or something that went wrong.

Full details are in spoiler

Spoiler ([Click to View](#))

See the end of this message for details on invoking
just-in-time (JIT) debugging instead of this dialog box.

***** JIT Debugging *****

To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

```
<configuration>
  <system.windows.forms jitDebugging="true" />
</configuration>
```

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.

(Jul 29, 2017 11:56 PM)Who Soup Wrote: [\[CITE\]](#) I'll have a patch for it by tomorrow I think I know the problem

No rush, just want to make sure I can help out with whatever I can ?

Quinn. - July 30, 2017, 1:31 am

Pretty nice program, have you thought about doing a Google extension or something?

Who Soup - July 30, 2017, 12:16 pm

(Jul 30, 2017 01:31 AM)Quinn. Wrote: [\[CITE\]](#) Pretty nice program, have you thought about doing a Google extension or something?

I would but I only know how to code in .net :(

10x - July 30, 2017, 2:15 pm

Hey boss why not make so that you can actually see what the PM says in the preview, thanks.

Who Soup - July 30, 2017, 3:41 pm

(Jul 30, 2017 01:13 AM)?Üta? Wrote: [\[CITE\]](#) No rush, just want to make sure I can help out with whatever I can ?

It turns out that you have to set the refresh time to 30 seconds. I PMed Omni about this and he said that if it's greater than 5 seconds it could time you out for the hour.

Jopemeister - July 30, 2017, 3:42 pm

this is awesome, i hope they release the api for l33t

snappari2 - July 30, 2017, 4:03 pm

Oh that's awesome mate thanks for sharing and creating

Boolean type - July 31, 2017, 5:19 am

Looks dope, i will definitely check this soon.

Effexion - July 31, 2017, 5:26 am

This is just what I needed, thanks a ton.

Horus God - July 31, 2017, 5:26 am

Looks Great, Thanks for this.

Who Soup - August 1, 2017, 9:05 pm

Just fixed some bugs, everything should be working perfect.

Also I messaged Omni, I had to change the update time to every 30 seconds or you'll get timed out per hour.

Everything should be fully function now. If you have any other suggestions please let me know ?

H4K453 - August 2, 2017, 7:23 am

better notification window feel like windows 10.

maybe split into worker and GUI for changing details, so worker can be set to auto startup with user set details

(when worker init on startup it could tell how much new pm user has)

and more modern look for GUI that could use from nuget MaterialSkin Updated

Who Soup - August 2, 2017, 2:58 pm

I wouldn't want to do that because that requires storing it somewhere

H4K453 - August 2, 2017, 3:00 pm

(Aug 2, 2017 02:58 PM)Who Soup Wrote: [\[CITE\]](#) I wouldn't want to do that because that requires storing it somewhere

well it needs storing for example it could be reg

but that would be most loved feature by people as now they have to turn it on each time and enter details if they close it

?Üta? - August 2, 2017, 3:46 pm

(Aug 2, 2017 03:00 PM)H4K453 Wrote: [\[CITE\]](#) well it needs storing for example it could be reg

I disagree. Per safety of my account I think NOT storing is better.

H4K453 - August 2, 2017, 3:49 pm

(Aug 2, 2017 03:46 PM)?Üta? Wrote: [\[CITE\]](#) I disagree. Per safety of my account I think NOT storing is better.

it can always be encrypted and later decrypted in memory while worker starts without ever passing raw API key in any storing way

Khamul - August 2, 2017, 3:53 pm

Nice tool buddy, no need to have the user enter their UID though fam :)

Who Soup - August 2, 2017, 4:39 pm

(Aug 2, 2017 03:53 PM)Khamul Wrote: [\[CITE\]](#) Nice tool buddy, no need to have the user enter their UID though fam :)

Thank you for your response, I just implemented it in the latest download

(Aug 2, 2017 03:49 PM)H4K453 Wrote: [\[CITE\]](#) it can always be encrypted and later decrypted in memory while worker starts without ever passing raw API key in any storing way

I just added an auto fill option for those who would like to use it.

As long as you don't share your .exe your information should remain safe.

Younis Khan - August 2, 2017, 5:54 pm

(Aug 2, 2017 03:46 PM)?Üta? Wrote: [\[CITE\]](#) I disagree. Per safety of my account I think NOT storing is better.

i agree with this user, unless ur gonna encrypt that shit a lot sir

Who Soup - August 2, 2017, 6:44 pm

(Aug 2, 2017 05:54 PM)Maaz Wrote: [\[CITE\]](#) i agree with this user, unless ur gonna encrypt that shit a lot sir

As of now it is not encrypted though it is stored internally with in the program. The only way that it will be a problem is if someone takes the program and reverses it.

My security recommendations would be to store it in a folder and have a shortcut on your desktop so someone can't quickly drag and drop it. If for some reason your program has been compromised IMMEDIATELY [API Key](#) page and delete that key.

I would also HIGHLY recommend locking the key to your IP address as that will provide you the maximum protection offered. By doing this even if they somehow get your key they won't be able to use it.

EDIT:

just added this to the main thread.

Thank you for bringing this point up as security is definitely our #1 concern. ?

Transporter007 - August 3, 2017, 7:54 am

Nice work and good application.

Keep up the good work. ?

Who Soup - August 5, 2017, 1:33 pm

Hey guys,

First off thank you for the support with this project. I'm glad that a lot of you enjoy it.

I just updated the download with the latest version. When you receive a PM now it will mimic what it looks like on HF for a better user experience.

If you have any recommendations please let me know. I take all recommendations seriously and hope to create a program that fits the interests of the community.

Who Soup - August 10, 2017, 3:01 am

Newest update:

- Login notification added
- Patched the bug that showed the most resent PM every time you login
- New log feature that will let you see messages you missed if you didn't see the notification (icon changes similar to receiving a message on discord). For security reasons logs are not stored and will be erased when the log window or application is closed. I also added an option to disable logging.

Syllable. - August 10, 2017, 3:08 am

Perfect so far, thanks for releasing this tool free of charge.
