Thread: [Is using fake/bot likes for a facebook page bad?](#)

Calibur - July 29, 2017, 8:09 pm

Im planning to make a website about designs, and I already thought of creating a page for my website as well but im thinking of buying about thousands of likes for for it.

So i'd just like to ask if using fake/unreal likes affects your page on any way?
Like will it less likely appear on somebody else news feed, etc.

Sorry for my english, im trying my best but im really having a hard time explaining what's on my head. :Gratte:

It does not matter. Just do not be overly exaggerated.

Don't make it excessive, because it will be really weird if you have thousands of likes but the posts are only getting a few. And from personal experience I couldn't find a reliable bot that worked, if you are successful id be interested in knowing what you used :)
