Thread: [Revenge-Rat / njRAT wont work.](#)

chiinx1996 - July 29, 2017, 9:57 pm

Hey, i tried to setup a RAT but i wont work. I cant Port Forward atm so I'm using proXPN+No-IP. For the Host I'm using the DNS from No-IP. After I'm finish building i open it but i dont get any new clients. Btw Im using a VM.

AdmiralHere - July 30, 2017, 12:03 am

Contact my skype: delta707140@outlook.com I will help you get setup if you want

DO NOT USE No-IP. As soon as they notice you're doing something illegal, they will terminate your services and if you fucked up enough, they'll pass the information to Law Enforcement.

Thank you.

No-IP has basically become an FBI/other law enforcement agency honeypot.

OP for more help, post in our [Remote administration tools section](#)

I disagree.

Microsoft suspected some of customers were abusing service for malicious purposes. However, instead of reporting the malicious activity to abuse department or law enforcement, Microsoft decided to secretly sue in civil court.

regardless, it seemed like a one personal time thing

Oh sure, let's just use it and risk going to court... No-IP just isn't worth it, it's been that way for about a year now.

Also, multiple people's services were closed down because of malicious use, not just one.

He didn't ask if No-ip is good did he? Lol

Just get a cheap VPN, with portforwarding features and use that. If you don't do illegal stuff any VPN with that feature will do.

i am just saying that because no-ip is not recommended

chiinx1996 - July 30, 2017, 9:19 am

Well my main problem is that i cant port forward atm, any free vpns out there i could use?

Frankey - July 30, 2017, 9:30 am

Nah, don't think so. They only cost a few bucks per week though.

Opakee59 - July 30, 2017, 10:23 am

Hi all,

I have a big issue when i compile my stub.

Have an idea of the problem? Netframework? (i already have 4.5)

Take a look : <http://hpics.li/2494245>

Don't post off topic like this. You'll get more help with a thread created for your own issue.
