Thread: [RSS Feed to social media plugin](#)

Ice. - July 30, 2017, 3:02 am

I'm looking for a plugin that uses the RSS feed to post from x section to social media accounts like Facebook and Twitter. Others are a plus. Note: I checked the mybb 1.8x site for this and found these:

You could make a cron job that uses the RSS feed, narrows down to the specified FID('s) and posts using the social media's API.

If you don't know how to do this, and you're willing to pay, then this thread belongs in the marketplace.

You do know that the website that you are staff on is dead, right?
