Thread: [HackForum Money Makers \[Must Read for Newbies\]](#)

L333T - July 30, 2017, 7:28 am

Hola amigos.

I am Nabid007 . An Online Entrepreneur. I won't say if i am successful or not cuz my Bank knows it. Neither it's relevant to todays topic. I am sure if you are reading this thread then you are a Newcomer in Hackforum or Newcomer in Entrepreneurship . If so then you are in the right thread my dear.

First of all , I would love to ensure you that you can make decent amount of cash to Six Figures per month on the internet. Thank God the only requirement is having a "Brain" .

I would love to list some steps you need to do in order to be successful in Online Entrepreneurship. Here they are :

#1 : Find a Product : As the title says , you need something to sell. Be sure to choose something that worth selling and most importantly , You would buy the same product if someone else offers you.

#2 : Find a Marketplace : No one is gonna buy from you unless you have the product up in a marketplace. Marketplace increases the trust score of the client.

#3 : Find your clients : While having Hackforums , it's one of the easiest part to do. You can find clients for almost anything. Just make sure you advertise with wisdom.

#4 : Making the right sales thread : Yes it is important. You also need to know some psychology of buyers. Need to put the right amount of colors and edits so that it gets the right exposure.

#5 : Giving out Vouch : Let's admit it. No one is gonna even buy your product unless you have review. So, you need to put your some of the products for vouch as it will be giving you much more in return.

#6 : Never break trust : In order to constantly getting sales , It's one of the most important key. Doesn't matter what you are providing ,you need to provide the product you are promising.

#7 : Over-Deliver : You promise the service or product and you over deliver the client. That's gonna make your client more close to you and it will make him continue more business with you. Never under deliver. It's gonna make a long term disaster for your company.

Well that's the basic of the Online Entrepreneurship. I have earned enough in the past two months. As i am in a offshore country it costs me really tiny amount of my profit to live lavishly. So, I guess i am close to my dreams. However , After my thread in [The Lounge](#) a lots of you were PMing me to share my method. I can't disclose all of them. But I was thinking to start a Mentoring Service by my Students. Soon i am gonna make it official.

Till that follow this thread..

I will include the Mentoring Course link in this thread aswell...
