Thread: [suicide.moe](#)

covet - July 30, 2017, 8:55 am

<https://suicide.moe>

any feedback is appreciated!

[another feature i didnt add was the fact that the images in the corner are hosted by a js script and change on every refresh!]

[email accounts are available upon request (limited time)]

I'd recommend adding a better background like a anime qt to fit the whole theme of your thread design. I like the qt in the bottom corners though.

this was considered but if i did i would want to make it animated too, although a server upgrade is due soon so it may be added soon!

Why in the world would you pick Suicide as a name for a file uploading site, I bet it wil trigger a lot of people and make them skip your website.

Did you know that "moe" means tired in Dutch? Suicide and tired (of life) kinda fits together.

People that get triggered over a website name need to die anyways

Asileux - July 30, 2017, 11:00 am

Do you guys remove all information from the picture?

NinjaLeaks - July 30, 2017, 11:02 am

Nice site man, just watch out some people will be uploading cp and shit, do you have a way around this?

Ice. - July 30, 2017, 11:20 am

The source, since the only link is in the thread design:

<https://github.com/VottonDev> cb to search through his stuff.

well I don't check files, if they are uploaded, I encourage people to report it so I can purge the file/s

Did you know that "moe" means tired in Dutch? Suicide and tired (of life) kinda fits together. if it triggers people, get over it, i dont care. if people dont wanna use my site because of a stupid reason like that then go ahead.

(Jul 30, 2017 11:00 AM)Asileux Wrote: [\[CITE\]](#) Do you guys remove all information from the picture? we dont touch the files uploaded by our clients/users data. the only way we interfere with files is when i have been given a legal document stating that i am to do so. e.g. a subpoena

tempocash - July 30, 2017, 11:56 am

Nice site looks good, i would choose other bg tho.

icmp - July 30, 2017, 2:43 pm

I uploaded a php file and php-cgi actually interpreted it.

You might want to have a look at https://www.owasp.org/index.php/Unrestricted_File_Upload

Edit: my bad it was a spelling mistake in the nginx config. thanks for this, should be back up soon, just fixing a few issues

SenpieTheGod - July 30, 2017, 8:37 pm

Care to message me your discord tag or skype? (since I can't PM) - I'd like to contact you about something.

Invested - July 30, 2017, 8:38 pm

So is this only webhosting or do you support VPS/RDPs etc?

You might want to have a look at https://www.owasp.org/index.php/Unrestricted_File_Upload Lmao the glory of pomf clones. Everyone implements it, knowing nothing about website security and then you automatically get free boxes by searching common pomf strings on google ?
