Thread: [Your PC Setup! What's on your Desk?](#)

**SIM-3609092** - July 30, 2017, 5:30 pm

Hey HackForums!

Just purchased a new motherboard for my gaming rig after my old one got fried about 2 weeks ago!  
It's nice to have my beast back!

I was curious to know what everyone elses' setup looks like so feel free to share below and / or recommend some improvements I could make to my own!

Current Rig:

Spoiler [\(Click to View\)](#)

- Mobo -> Z97 Anniversary Edition
- Processor -> Intel I5 4690k
- Ram -> HyperX DDR3 2x8GB
- GFX -> ASUS Strix GTX 970 4GB

Current Setup:

I see you plugging your merch (right monitor). Looks good tho.

Here's mine:

Front-view [\(Click to View\)](#)

Side-view [\(Click to View\)](#)

Specs:

Code Asus motherboard z170 pro gaming  
Intel Core i5-6600K Skylake Processor  
Fractal Design Define S  
EVGA Supernova G2 750W  
(x5) Fans  
(x2) HyperX Fury DDR4 2133MHz 8GB  
ASUS GeForce GTX 1070 Founders Edition  
SSD 850 EVO 2.5" SATA III 250GB
