Thread: [csgo 3600+ ping?](#)

Mutiny - July 30, 2017, 7:57 pm

im trying to play csgo no one is on the internet, i restarted my computer and router and opened steam nothing else opened and it goes from 500-3600+ all the time. Im global elite on my main and trying to rank up my smurf and i cant play im mg2 atm. anyone know a fix?

It's funny how you gave useless context by saying you're Global Elite and you're trying to rank your smurf.

Lol plz don't talk about mm ranks they mean nothing at all. My mate is global who is actual silver so.

I'm pretty sure you're talking about FPS here.

You can go above 1000+ for ms.

Obviously there's something wrong with your connection. Start with closing other programs that are using network.

```
open cmd
ipconfig /release
ipconfig /renew
```

In netgraph it went above 2000+ ping. Netgraph shows accurate ping as the one on the scoreboard is limited and off by about 20ms I believe. I spoke with my ISP and something was wrong with their end. Back to 5ms :)
