Thread: [Looking for a partner who knows reddit \[I can get traffic, lets make money\]](#)

Like some of you know, I have my reddit upvote service as well as reddit accounts shop. I can get us reddit traffic easily. If I do everything right, I can probably get us to /r/hot and usually people will pay \$500-\$1000 for that type of service.

So I can get us traffic, I need somebody who can monetize this.

Requirements:

- You have been a reddit users for a couple of years
- You have a PLAN on how we can monetize reddit
- You're willing to work together on this

Hit me up if you think you're the one who can do this. We can make some good money.

This opportunity is still available, we can also just sell upvote service somewhere.
