Thread: [Deadly Heart Disease Gene Removed From Human Embryos](#)

Alice Dee - August 2, 2017, 3:51 pm

Here's the original research paper if you care to read.

<http://www.nature.com/nature/journal/vaop/ncurrent/full/nature23305.html?foxtrotcallback=true>

or the pop science version by iflscience.

<http://www.iflscience.com/health-and-medicine/deadly-heart-disease-gene-removed-human-embryos-revolutionary-study/>

Lukos1234 - August 2, 2017, 6:55 pm

Dat genome editing is the future of the human race , either that or cyborgs or brain transfer into virtual profil. (or a mix of all :p)

brb superhumans.

inb4 Welcome to Gattaca

Interesting note : Jeff Bezos the owner of Amazon is actually investing a lot into immortality research.
