Thread: [\[WORKING BOT\] Unlimited followers for Instagram/Facebook/Youtube/Twitter Bot!](#)

EmpressLeona - August 3, 2017, 3:42 am

Hi, I have a bot that works for Instagram/FB/Youtube/Twitter. It also works for VK/Ask.fm/OK.ru

You add your account(s) to the bot then let it run in the background. The longer it runs the more coins you get. Coins are used to purchase followers. So if you have a VPS, you can basically get unlimited followers by letting it run in the background.

This is just the SocTop bot.

It's a free service which is sort of a massive like for like network.

That referral link gives us both a bonus.
