Free database lookups. Just PM me using privnote.com with the details and if you want me to lookup emails after I lookup usernames.

Template:

Code Username:

Email:

IP:

First Name + Last Name:

Lookup extra information if applicable - yes/no

Before you PM me, try use skypegrab.net and search their email to get a skype name - try find old IPs by resolving it. Attach those to the privnote.

(staff moved this to deal dispute LOL)

Nice of you to do this for people.

If you need any help, don't hesitate to message me as I to will look up for you.

How ever, you're most likely good haha.

What the fuck, I swear to god I didn't post it in this section.

Staff moved my thread- i'm assuming they tried to put it here [Free Services and Giveaways](#)

It was here [Service Offerings](#)

Hey Mr. Robot, I am assuming you're doing this via your own databases, but if you need a LeakBase account for a few days I can give you one as well.

Just PM me man.
