Thread: [SOURCE CODE for Runescape bot coded in VB.NET](#)

SIM-3327349 - August 4, 2017, 2:52 pm

Hello, I want to share source code in my Runescape bot which I coded maybe year ago? It's not good, the code is terrible, but it was working good. It made my Magic lvl 99 in few days :-)

Some variables and functions are named in Czech language, so I created few comments for you.

BTW: I don't remember very well how it was working, so if you have any question, then you can ask, but I don't know, if I will be able to answer

Download project: [https://drive\[WARNING POSSIBLY INFECTED\]google.com/file/d/0B5nYZ6Jukgu_bGJKRUhOTEE4R2M/view?usp=sharing](https://drive.google.com/file/d/0B5nYZ6Jukgu_bGJKRUhOTEE4R2M/view?usp=sharing)

No problem ;-) .. Maybe it will help some people with coding their own pixel bots :-)
