Thread: [I have about \\$60, what tips / techniques \(no ewhore\) should I use?](#)

BettyB - August 5, 2017, 10:30 am

I have about \$60 and I'm looking to make more. I started off with checking at some ebooks here on HF, but I've read that most of them are saturated and not very good. So I reach out to you here, What's your favorite thing to do to earn cash? Don't get me wrong, I might invest in an ebook if you can offer me a nice one for a nice price. Thanks!

You should list your skills, that way we can recommend something that you will be able to do

Possibly try crypto investments. Won't be fast money, but can maybe get you a hobby. (and yes, bank is possible) .. I started with \$20 literally.

Have lil more now, but most is still invested, which means its a risk.

Cheers.

Do research yourself if you do this op.

Probably the only reasonable thing you can do with \$60 unless you like to read real books about a subject you are interested in for your future.

<https://coinmarketcap.com/>

I'd probably look into ethereum or GNT. Best of luck!

audemar - August 5, 2017, 10:14 pm

I believe cryptocurrencies is a good start. I would recommend the following:

<https://coinmarketcap.com/assets/basic-attention-token/>

I heard it should reach \$1+ by October and has great potential.

Dollar and money matters only a bit

matters only what knowledge you have and what goal / Aim do you have?

Its internal motivation to find a work that suit you according to you
