Thread: [Sky rocket](#)

Hooper - August 5, 2017, 4:42 pm

I can't believe bitcoin skyrocketed like that. I thought the fork would be for the worse.
How do you think the currency will be in the future

Ratt - August 5, 2017, 4:46 pm

Kill Joy called that, he told me he was estimating Bitcoin to rise after the fork.

thrudda - August 5, 2017, 4:48 pm

Same here, though BTC would drop due to FUD

Kill Joy - August 5, 2017, 9:36 pm

SegWit2x activation at the end of August will probably boost. I think we'll see heavy resistance around \$3500 until right after it's activated. Until then \$2800-\$3400.

\$5B market cap from BCC went directly into BTC last night. Money flooded the market. It could stay in, maybe it'll get drawn out, no one knows.

Actually ETH rose a higher percentage than BTC yesterday and today as well. Which is nice since it was pretty beat up for the past month. I'd like to see it at \$350 again.

Market cap up \$14B so far in the past 2 days. A welcoming sign.

That's like asking him for the last 4 numbers on his credit card. Get with the fucking program buddy ???

Donald Trump Jr. - August 6, 2017, 11:35 am

Good. I see predictions all over the place we'll see Bitcoin at \$5000-\$6000 in 1-3 months.
