When I was using an older version of memu I could send videos through lynx, now they load like they are sending and fail to send. Anyone knows how to fix that?

I will advise you to send through mail, and attach dropbox to the mail.

You can also use google drive if you have Gmail.

if i was able to send videos, i would make bank. but me too, cant send it.

this is one reason, im gonna stop kik; leave it ad start snapchat ewhoring. kik is nearly dead.
