Thread: [Windows VPS with ~3GB RAM](#)

Luke - August 6, 2017, 1:50 pm

Hi,

I'm looking for a Windows VPS to host an OSRS bot on. I run OSBuddy on a VM with 3GB RAM normally, so I'm figuring this should be enough. UK/Europe server location preferred.

HMU with specs and a price /mo.

Cheers!

ThomasGB - August 6, 2017, 5:28 pm

Check this if you that sweets ur need , it's EU location .

price is 13.5€/m without OS

if u need windows 2012 | +7€ | 2016 +8€

CPU: four cores

300 GB disk space (100% SSD)

Intel® Xeon® E5-2620v3, E5-2630v4 or 4114 processor

12 GB RAM (guaranteed)
