Post your earnings so far here.

Personally I bought in at 41 and is at 47 now, will hold until I see others starting to cash out (I like to follow in crypto) what about you guys?

THE NORTH FACE - August 6, 2017, 7:48 pm

I bought at \$6.10 and sold to day around \$15. Hopefully it drops a bit and I want to rebuy maybe tomorrow.

Edit: only about 30 coins BTW. Still a nice little profit.

Please try to give amounts in USD. Cause most people here are more familiar with USD/BTC prices

I want to hold this long but it seems risky :/ When do you think you're selling?

Explanation on that?

Other question what makes it risky for you? I cannot deny that the actual price is really high at the moment, but they have a working product and a huge activ community.. So partnerships are missing..

If you take a look at other projects you will notice that the whole product is missing.. And also if projects like Ethereum dont adapt to the market (means be active and be aware of competition) it can also decrease or stop at its actual value.. So there is no guarantee.

PS: If you want to make huge profits you have to take the risk..

I don't think that's risky at all, NEO is getting HUUUGE support and the upcoming releases only makes it more interesting.

I will sell whenever I feel like selling, my guts tell me to wait till it hits \$200+.

It can be as early as 2018, or somewhere around 2020, I'm not rushed.

I can't predict the future but I got a good feeling with this coin.

Agree PotatoBlood. For me this is a long term hold also. Sure a lot of things can happen and it is like that with anything but this one does have a good feel to it. There is some amazing potential here. If it dips to a level I like I will accumulate more and more over time. For those who sold good on ya I hope you reaped some nice gains.

Havent been active in looking at crypto so I missed the train. I'm looking at entering around at \$16 which I am hoping happens by Saturday. Its approaching the test for major resistance so it will be interesting to see what happens tomorrow

It dropped down in the 15s within the last 24 hours, hope you got in when you wanted to.

I have 450 NEO. I like AntShares and the technology it brings. Ethereum is still my favorite coin and takes up most of my portfolio.
