Thread: [How to add GIF in signature?](#)

The Sales Thrash GOD - August 6, 2017, 8:45 pm

Hey, i just received l33t a couple of hours ago! (horray)
But i was wondering how do i add a gif in my signature?
Thanks

EDIT: And is there a way i can have my profile pic be a gif?

Delph - August 6, 2017, 8:46 pm

I assume you simply link a direct link of the gif for your profile picture.

For the signature try adding this. Code [img](linkhere.gif)/img]

M?xim - August 6, 2017, 8:47 pm

Yes, and yes.

Use the IMG-tags for it.

Code [url]Image-url[/url]

test - August 6, 2017, 8:49 pm

EDIT: And is there a way i can have my profile pic be a gif?There are dimension and file size requirements so make sure your gif falls in those ranges.

Egregious - August 6, 2017, 8:50 pm

Code [img]https://i.imgur.com/2fqxcAJ.gif[/img]

mission failed we'll get em next time

The Sales Thrash GOD - August 6, 2017, 8:51 pm

Wait wtf? not sure i can view gifs on this website it shows up with a screenshot of this:

<https://gyazo.com/d6a11a823b1cda3cc3e8197fb0701dfb?token=c8f25ab4acf06bea74b24d01630c09f3>

Oh wait NVM LOL thx

It works, try it without [code] tags.

Conor McGregor™ - August 6, 2017, 8:52 pm

I believe you can just upload your gif to imgur and then link the imgur..

SIM-82498 - August 6, 2017, 8:53 pm

Here's how to get the direct .gif link from Imgur:

M?xim - August 6, 2017, 8:57 pm

The signature you are trying to use is 1000 KB, it will not work. Max is 500 KB.

The Sales Thrash GOD - August 6, 2017, 8:59 pm

RIPP illl just wait till later im to tired to edit tall these gifs etc.

what about my profile picture tho? wait nvm

zFacetious - August 6, 2017, 9:03 pm

The link in your sig is the entire page, you just need image address

<https://i.imgur.com/2fqxcAJ.gif>

also just noticed the size aswell!

Gluck

Here, use this:

Code [img]<https://i.imgur.com/aNNvOHO.gif>[/img]

Some loss in quality, but reduced the size enough to fit in your signature.

Original:

New:

Nevieth - August 6, 2017, 11:06 pm

Also make sure to change http:// to https:// in your signature.

Otherwise it'll only show up as text.

<https://gyazo.com/b7debd0f201c042f3fb570afb0d0ca8d>

If i get 1 more error im going to go crazy

Elitas - August 7, 2017, 5:37 am

Replace:

Code [img]https://i.imgur.com/aNNvOHO.gif[/img]

With:

Code [img]https://i.imgur.com/aNNvOHO.gif[/img]

Two-Ton 21 - August 7, 2017, 5:37 am

Code [align=center][img]https://image.ibb.co/dPJNba/aNNvOHO.gif[/img]][/align]

It just needs to be resized, the code won't work it said width 650x200 ima see if i can convert it

Cammy - August 7, 2017, 5:40 am

Amazing how it takes nearly 3 pages of posts to explain to someone how to set a signature image on a technology/hacking oriented forum
