Thread: [Personal Portfolio](#)

Mister Slyther - August 7, 2017, 6:16 pm

While I continue to make mistakes, and learn from them. I'm doing my best to improve. I also do apologize for being an absolute trash in the section of Graphics. I miss-treated a Designer named Avesso. These are just things I wanted to mention while posting this.

I opened a second website, my personal portfolio: www.aashhab.design

I'm doing my best on becoming a professional UI Designer. I have learned animation recently and started applying it into my designs. I'm also changing my course from Graphics Design to Interaction Design for my Bachelors Degree.

Updates as of 8/19/2017:

- Got accepted for course transfer after an interview for Interaction Design BSc.
- Started learning how to create HUD's and animate them in aftereffects.

Updates as of 12/28/2017

- Massive progression has been made.
- Got the 2nd highest grade of 77% in class which qualifies me for the top band for the first unit of this year (2017)

You can check out my university blog, this is compulsory from my university as this is how we get marked and all the projects I do are on there.

I've seen a lot worse work considered professional. We're definitely in a minimalistic era for design and you use texture and blurs well.

I can see this level of skill used at many levels graphic design.

Personally, it doesn't take any chances though. I think if you want to bring your work to next level, try something outside your comfort zone.

Hey man, thanks for the post.

Absolutely what you said is right and thank you.

What's the point of this thread?

Since it's in the Rate My Graphic (sub)forum, what exactly are we suppose to rate? Every single work of yours or what? n_n

Hi, no not exactly.

You can just give feedback based from the overall perspective.

Mister Slyther - August 15, 2017, 2:43 pm

portfolio updated - changed the design and added some more work

Mister Slyther - August 18, 2017, 6:59 pm

updated once again - moved to squarespace

ICento - August 18, 2017, 9:54 pm

In all honesty, I really do like the look and design of a lot of your stuff, most of your stuff. You are definitely on the minimalistic train, which is a good thing nowadays as it's growing in popularity exponentially. Keep up the good work!

RUMRUN - August 19, 2017, 4:40 am

I like it man, plain and simple.

Personally I'm not into the black websites but it looks neat.

Mr. Robot - August 19, 2017, 4:48 am

Damn hell yeah dude, one of the few sites people on HF have actually made. That's fucking really nice.

PM me when you see this.

Do you code any of these UI's into live sites, or are they kept in After Effects?

I'm a graphic designer/web developer, shoot me a PM, we should talk & network.

The planning and wireframing is done in Adobe XD, then i move the stuff into aftereffects to allow animation. Export it in quicktime and import it into photoshop to export as gif.

I don't code them into live sites. I can write and understand html5/css3, but i still need more practice before actually coding the websites. The only one that I coded was Travel Smart.

And sure man, ill reach out soon.

Mister Slyther - August 20, 2017, 4:08 pm

logo has been updated with some animation

Cool stuff

I like how advanced your site is, how long did it take to make?

Also how long have you been doing gfx?

Hey man, thank you. I'm using SquareSpace as my portfolio site builder. Really nice and great to use, allot of options, and custom CSS editing.

I started GFX late 2014 making signatures, tags, etc..and overtime around late 2015 I found my

interest to be in UI Design (apps and websites etc..) and I only started taking it seriously at the end of 2016.

Max_Lietz - August 22, 2017, 3:22 pm

Woah, really clean portfolio.

The animations really make a huge difference, so much nicer to look at.

Currently making my own portfolio but as i'm not familiar with coding and only graphics it's pretty hard.. Would love some help if you have time :)

SIM-2315787 - August 30, 2017, 8:51 am

You seem a lot talented. I really loved your portfolio.

10/10

Lukas - August 30, 2017, 12:36 pm

You have some really good work. Your portfolio need some bettering up though, it's pretty boring. A talented artist such as yourself requires a more abstract way to display work. I could do this for you.

Anyways, I do really enjoy viewing your art. Most it is very vibrant and you don't necessarily stick to one style and color scheme. Good work.

Comparing the quality of your work and the quality of your website I feel like you could do better design for your website, the header doesn't look as good as you could do. Not a fan of these effects.

Thanks for the feedback buddy, but I was inspired from this persons site:
<http://www.dennisschafer.com/>

I'm not gonna put a ton of effects and design a full-on site when I can nicely present everything and lay it out to look clean and good.

Sure man, I'm not telling you to add more effects but work on them a bit more, the effects on the header look a bit off to me.

But it is a personal preference.

Good luck with your career as Designer ?
