Website Name: Slyth (Slither)

Type: Forum

Topic: Technology

Description: Slyth is a Technology based forum that will discuss everything from Security, Networking, to Hardware and Mobile Devices.

I'm hoping eventually we can have more topics like how HF went from simply "Hacking" to a ton of general topics as well.

Check us out: <http://slyth.net/>

Brand new. This is mostly for fun but I will put time, effort, and money into it as well. Paid advertisement to come soon.

Don't worry, I'm sure this won't go anywhere so you don't have to inform me :)

Would you consider a partnership? Cause I know how to turn this forum into a success. Plus, I love the name ;)

Well I'm open to it, PM me when you're able to and we'll talk.

I can't PM you since I don't have enough posts. I'll shoot you a PM on Slyth. ?

Yeah that'll work, looking forward to speaking with you.

I don't see you putting any effort in making progress. Is it because you're still waiting for the partnership to be done?

Actually I have haha sorry it doesn't appear that way on the surface. I'm currently planning out tutorials and things to post on the site to have content to offer potential/upcoming members. I've

been chatting with some of my former classmates and associates who participate in Computer Programming and things of that sort to help me out a bit.

I'm not at all relying on that partnership, I'm totally prepared to do this on my own and that guy never even contacted me so he must not be serious. I'm going to get better Advertisement and such after I add some content to the site. Hopefully then it'll attract some members. But a forum doesn't grow in a day, and I don't plan on letting this die within a month or two so I'm just taking my time right now really.

Hopefully this answered your question.

Will keep that in mind, thank you for the kind offer. If I can assist you in anyway please don't hesitate to ask either.

Can only do one thing at a time :P I read your message but decided to respond to everything else first because yours required more focus. Sorry for the delay.

Looks real good, might give it a try later.

Currently its just open for anyone who would like to help fill the site with content, but if you'd like to wait until there's more content loaded that's fine too. A lot to be done till I expect a lot of activity.

Thank you for the compliment though.

I don't know if this makes sense but it definitely looks like a forum, specifically a hacker forum. Darker colors suit it well

Currently working on getting some really original and High Quality userbars made for Slyth:

<https://hackforums.net/showthread.php?tid=5703790>

Following this will be a Thread Design, Ad Bars, and Ad Signatures. Can't rush success and that's why things are going so slow with the site. Everything must be perfect before I start pushing real advertisement and all that!

Also currently seeking a Partner: <https://hackforums.net/showthread.php?tid=5700426>

Looks like it has potential, but only one thread, what happened there? :o
