Thread: [Can an uber member view my IP address?](#)

timeforcoin - August 8, 2017, 3:16 am

Ever since last night when an uber member got pissed at me my wifi hasn't been working.

Now I can't choose my courses for school and I'm gonna get fucked over. It's too early to call my isp and I'm going crazy here.

I think I'm being ddos'd by this uber member. Is that possible that he got it thru hf?

vaiperboy - August 8, 2017, 3:17 am

no, ub3rs can't view IP's

only staff+ can read. Thats it's

timeforcoin - August 8, 2017, 3:21 am

Ok, thanks for the answer. Shitty wifi I guess :(

vaiperboy - August 8, 2017, 3:24 am

Watch the video, OP. The other method will only change your local IP and won't prevent you from being DDoS'd if at all.

?lex - August 8, 2017, 4:55 am

Call your ISP and tell them that your network is being attacked. They will change your ip.

test - August 8, 2017, 4:57 am

Regular members are unable to get your IP directly through HackForums. They may have got it some other way but HF does not display that information publicly. Calling your ISP and explaining

your issue is probably a good idea.

Omniscient - *August 9, 2017, 9:07 am*

A couple things.

1. Anyone can get your IP if they really want it. But members don't have direct access to your IP from HF.
2. Don't piss people off.
3. Does your hard connection work? You may just need to reset the router.
