Thread: [\[BAT\] How to check for locked files by Hackoo](#)

Hackoo - August 9, 2017, 12:28 am

Hi ?
This source is inspired from [How to check in command-line if a given file is locked \(used by any process\) ?](#)
Check_Locked_Files.bat
Check_Locked_Files.bat ([Click to View](#))

Hackoo - August 11, 2017, 4:38 am

I made an update for this script :

Description of this script : Check_Locked_Files.bat :
This script can scan and check for locked files on a set of folders that can be modified into the script; for example, i have chosen those set of folders to be scanned :

```
Code Set Folders=^
^ "%ProgramData%\Microsoft\Windows\Start Menu\Programs\Startup"^
^ "%UserProfile%\AppData\Roaming\Microsoft\Windows\Start Menu\Programs\Startup"^
^ "%ProgramFiles%\Internet Explorer"^
^ "%ProgramFiles%\Skype"^
^ "%ProgramFiles%\TeamViewer"^
^ "%WinDir%\system32\drivers"^
^ "%Temp%"
```

The output result is in HTML format for more readability.
If the file is locked we show it in red color otherwise we show it in green color.
I added a funny stuff : Play radio while scanning in order to let the user be patient until the scan ended
