really really really high quality stuff, I like the tiger a lot! You could maybe consider joining both the left and right sides together so you get rid of the middle line.

I'm digging that stuff on your website, art is top quality, colors are poppin'.

Very nice and clean. My only gripe is the stroke. Looks a bit crowded in the complex/detailed areas. Perhaps forgo the stroke and use a coloured shape instead with a gradient. Or do some manual stroke/shading/hilights in key areas.

your work honestly looks amazing, the tiger itself looks great but your other work on the site is really good!

If I was a millionaire with free time, I would buy that for 25k. It is really good work.

wow very nice bud, you could switch the colours i reckon if its simple it might have a totally different look.

how did you make this ?
