The image shows the screenshot from a scammer's Skype. In the bottom right you can see another person talking about their scam(s), possibly trying to collude. Their display name shows "Trapper of the " and cuts off there but easy to tell it is either a capital C or O.

On Skype there are only so many people with their names set to "trapper of the". You search that and see an account "deltamoxxy". <https://prnt.sc/g6erj6>.

That Skype name is listed on HF here:

<https://hackforums.net/showthread.php?tid=5299674&pid=51281874#pid51281874> from uid=3111518. This person also has a scam report against them for \$30 which you can see them mentioning in the scammers screenshot. Here is the DD: <https://hackforums.net/showthread.php?tid=5638247>. Trust Scan shows that the password has been reset within the last week (<http://prntscr.com/g6evrp>).

If this user returns, DWC. Thanks.
