Thread: [Instagram follow bot \(need\)](#)

There's one floating around made by D3vil. Was wondering if anyone had a link to it or something similarly.

It logs into your text page of accounts and has them follow the directed username.

Hi kate,

atm i'm working on Insta and Twitter Follow bot. Written in Python . Pm me , If you can't find anything .

Tell me your wishes and we can talk about it .

Regards

I was thinking to create one Instagram bot for creating accounts, following accounts and like posts.

I will notify us if I start working on it or if I find anything similar that can help you :)
