So cosmicpvp is a super fun factions server Which has a new anticheat called shiva, tbh its pretty hard to hack on the server the anticheats decent,

The thing is usually dura is used for durability damage

But on this server there are custom enchants so it makes dura to use both enchants on different weapons.

Any ideas on some clients that can bypass pretty well

Would love to hear suggestions

apparently youtube says everyone just uses virtue renames (literally like every cosmicpvp cheating video is using renamed virtue >.>) on there so clearly their new anticheat isnt very good...

just rename virtue yourself and be like everyone else?

Doesn't cosmicpvp use configured ncp? Last time i checked it did.

Zoro2003 - August 19, 2017, 9:30 am

um Im not sure But they took opticcraft duels assuming a edited or mabye just opticcraft anticheat?

So its hard to bypass shiva even the use of ghost clients,I think the AntiCheat is made of NCP but its different from other anticheat like GCheat the only way to bypass it is by the use of Vape lite or Premium

Dura doesnt work on cosmicpvp anymore at all and a good free client for it is storm b10 with lockaim

c\$sh - September 20, 2017, 6:46 pm

Cosmic doesn't even have that good of an anticheat. Maybe better than NCP but NCP is literally a fucking joke.
