<https://gyazo.com/348e20838b66ae602fbe11cff2d0d48d>First of all you came to me with a bad attitude
second of all you didn't give me a chance to contact Amazon

And you never mentioned the .ca AGC, also i sold you \$50 from the same source of that \$75 which means you're lying.

Also you're aware of the cards being ewhored so you acknowledge the fact that it can be revoked.

And it's not the first time i sold you an agc ? 10x ? 15x ? next time talk with a better attitude.?

Also it doesn't really matter if the cards have a chance to be revoked if you provided the terms that a refund would not be given in the offchance that it was revoked then please show it.

does that even matter, transactions went good and there were more after that, you just sold me invalid giftcard and are refusing to pay me back

And you got your chance but u clearly stated that you wont pay me back so this will stay up

Yeah sure, how about the fact that he has full awareness of the agc source and it might affect him, didn't even allow 24h to contact amazon

and the fact that he's lying about the .ca one lol (2 cards from same source, but one only got revoked ? not realistic)

I'm done here.?

<https://gyazo.com/91be6f08332c007fb30fd55f1dc56560> the 50\$ cad didnt get chargebacked but 75 did as you can see in screenshto above, i dont care from what source they are , and yes i have full awerenss and you have full awareness that your codes got chargebacked and that you are a scammer

why should i? when you clearly stated that you are not gonna pay me back

Once again share a screenshot of where you let him know that there would be no refunds in case of the card being revoked. Seems to me more like you are just a broke boi who cant afford to refund someone.

Themis - August 11, 2017, 1:47 pm

That agreement never occured. If it was in question we wouldnt have dealt.

User is just a poor scammer. Who admited to scamming several times.

I fucking hate when people say "came to me with a bad attitude". Like how is that even relevant?

Can't use Logic with scammers. It's beyond their comprehensive skills.

Ewhore or not, if you sell a gc and it gets revoked you must refund the buyer unless of course you

warned him.

Which he has yet to provide proof of him saying so.

Nope. They do not. If they did, 50% of HF users would be banned
