I have quit ratting a long time ago. But I know what I'm doing, and I'll help you set up your rat for free. Don't hit me up if you're going to use it for illegal shit - just tell me its legal what you're doing. ?

Pm me a message on steam, my username is decuavis 9928

Anything from portforwarding to errors to whatever you might wonder about. Hit me up on steam. (Im not so active here.)
