Thread: [\[Batch\] batch script plugin](#)

mrck10 - August 12, 2017, 4:27 am

i made a batch plugin in C# , its for making batch easier and better looking, without getting rid of that haacker man feeling.

anyway here is the file : [http ://www .mediafire .com/file/th4cxk21t8pepr0/Batch_Script_0.0.1.zip](http://www.mediafire.com/file/th4cxk21t8pepr0/Batch_Script_0.0.1.zip)

someone always post a virus cheack in replies.

need help? join my discord : [https ://discord .gg/UJzqxKj](https://discord.gg/UJzqxKj)

also the dll file batch4C# needs to stay with all exes, becuae it uses the bs class.

(for anyone who wants to use the batch script 4 C# , when you want to use it do this before u start your main or what ever

```
" bs bs = new bs(); "  
)
```
