Payment Proof

Vouches from HQ HackForums Users

Looking at the thread design, I don't see anywhere that the OP has lied about anything, It's very possible to make \$20 per day. The content inside is short and should be explained a little bit better for buyers who are new to the whole Amazon process. The method isn't some revolutionary never before seen so if you've been around here for awhile and actually know stuff about Amazon then this isn't for you. This is geared mostly towards newer users who want to start making some side money online. OP was friendly so I'm sure anyone who intends to buy will have no issues earning some money with this method.

The method itself isn't very innovative or revolutionary, and the profit margins are not to the level of what you would expect. It utilizes Amazon and if you have been on HackForums, you would know this is pretty much self-explanatory. There is some chance of making profit, but not much. There isn't much that this method will teach you and it's not very detailed. The eBook was organized and looked nice. If you are wanting to make more than \$50-\$100/mo, then this is not the method for you. However, if you want even the slightest of profits, purchase this, you may find it worthwhile.

(Aug 14, 2017 02:28 AM)Eagle™ Wrote: [\[CITE\]](#) I received Amazon Domination in exchange of a honest review, and here it is.

Everything in the thread seems to check up with the information provided in the ebook.

You can make some money from this yes, but this is a very old method and it has in fact been around for a while, so a lot of you who knows a decent amount about Amazon probably knows this. The profit you make from this isn't really a lot, but it all depends on how often you do it. So this is more a explanation for beginners, that has just started out with Amazon who want to make a side income but its not also really detailed.

The seller was very professional and also friendly, and the ebook can be a game changer for just new people starting out with Amazon. So to those people who are looking to make a small amount, this is for you.

Even though 500\$ for some people might not be as much, for others it might be a life changing amount, overall after reading this ebook

I find it quite well written as well as Hunted seems very nice and honest, was able to answer all the questions I had.

Overall this method is great for starters and could help quite a bit!

Thank you Hunted, and good luck!

This can easily be profitable and you could probably even branch this out into even more money making methods.

As far as quality goes the book is setup really well, you have to be a baby to not understand how to do it.

When I need side income I will probably go straight to this method.

At first glance:

From just looking at the ebook itself it has a really nice and appealing design and look, which isn't too hard on the eyes (unlike some ebooks which are literally cancer to read) HuntedCS does a great job at spacing everything out so you know where everything is and can follow the directions step by step without a problem. The ebook itself is not way to long which is nice since I know some people hate to sit and read for ages, but instead it gets right to the juicy stuff teaching you how to make cash rain.

The methods:

The methods provided in the ebook I can confirm are quite unique and at least from my part not saturated at all. HuntedCS gives detailed explanations on how to execute everything step by step and provides his personal contact info in case you have any follow up questions. If followed these methods can easily make a extra \$500+ on the side when done correctly, and are definitely something that can be repeated over and over again.

Difficulty:

Bro, believe me when I say it but a 5 year old can literally follow these steps and become a Amazon god overnight...

My ratings:

Design and look- 8/10 "Looks great, and is easy to follow"

Methods- 9/10 "I personally have never seen these methods before and can confirm that they can make you a profit!"

Easy to follow- 10/10 "A 5 year old kid can make money with this"

Overall- 9/10 "At the end of the day, this is a grab for anyone looking to build some quick cash and make money the easy way!"

That's the end of my review, everything I wrote came from me and HuntedCS had no influence over what I typed up.

Thanks for reading and have a great day!
Those wanting to purchase should send me a PM via HackForums!

If any vouch copies are left I'd love one if not I have some questions,

1. does this involve refunding, socisl engineering at all?
2. Does this involve drop shipping?
3. Does this involve purse or agc?
