How To Make Money With CPA

Hello Everyone! I have been messing around with CPA for a little bit and found a pretty good method to get some extra dollars. You wont be making \$1000 a day, and it takes some work but if you want some extra cash, This should help you out.

Intro

If you are reading this tutorial, I hope you know what CPA is, if not do some research. Now on to the fun part,

Making A CPA Account

The site we will be using for this is called "CPAlead"

So go to their site: www.cpalead.com/

and click "sign up," scroll down. You will now see this screen:

Spoiler ([Click to View](#))

Now fill in the details Correctly or you will not be able to withdraw funds. To verify your phone number, check out my TUT here: <https://hackforums.net/showthread.php?tid=5686454> once you complete the registration you can login (as a Publisher) and you will see your dash board:
Spoiler ([Click to View](#))

Congrats you are all set up to start making money! You will still need to set up Tax Forms and payment methods, but now on to the locker!

Making A Locker

In CPA, a locker is a web page that requires you to do a survey or interact with an ad to continue. We will build a locker to get "clicks" and make money.

We will make a locker advertising a download for a "Facebook money making ebook" you can chose another niche if you like but for the sake of the tutorial Ill be making this one.

To make a locker, click on "Tools" in the left hand menu bar:

Spoiler ([Click to View](#))

Now, these are all of the templates we can use, some cost money, but we will use a free one. Find

the template that looks like this:

Spoiler ([Click to View](#))

You may have to input your email and password to "Buy" the template, however it costs \$0 so you won't be charged. Click "Okay" then you will be brought to a settings page. Set the title and description to what I have here:

Spoiler ([Click to View](#))

Now find a pdf file about making money with Facebook and put it in the box labeled "File URL" if you don't see the box, make sure you selected the correct template.

Great! we're all set to customize the template. So head on over to the tab on the top labeled "HTML and CSS." You should now see this:

Spoiler ([Click to View](#))

This is all HTML code so I recommend you study up, it will make this part a lot easier. You can now edit this as much as you want. To save you time, and space on this thread, I edited the code and posted it here: <https://pastebin.com/c5Yq73kC>

Select all of the code in that window and paste the code above in.

Now, click the green "Save Changes" button, then click "Continue Editing" then click "Preview" next to "CSS" and "Payment button." This is the mock up of the final locker, if something looks wrong check the code.

Custom Banner/Colors. To change these click "CSS" on the top menu bar. Now you can change the banner image and header color as shown below:

Spoiler ([Click to View](#))

Finally, go to the bottom of the page and click the green "Save Changes" Button. Then click one of the links to see your finished locker! Now go forth and share that link on forums and other sites!

This is the end of the tutorial, I hope this helped you, and if it did feel free to leave a comment!

Hope My Guide Helped!

Greg
